Organisational development programmes and volunteering

**The volunteering has got a special place in our heart**

The organisation, entirely based on volunteering wants to help lonely people to have friends, young people to have a good education and career and sick people to diminish their suffering .

**Mission :**

To create for the beneficiaries a special place to express their opinion, to establish good relationships between seniors and children , to solve social and human problems , to always inform the community and mark their successes .

### **Objectives :**

- ✚ Sensitizing the community regarding the children whose parents left to work abroad
- ✚ Prevention of juvenile delinquency
- ✚ Material support of good pupils and students in social risk
- ✚ Financial support for very sick persons
- ✚ Supplying free social services at « The Daily Center for elderly »
- ✚ Development of the organisational capacity of « The Daily Center for elderly »

### **Socialization for children**

The right to have a family is one of the most important and accepted rights of the child, its importance and its complexity derive from its fundamental role in the child's growth.

The mission of our foundation is to help children from the poor families or those having serious social problems, by creating conditions for an adequate life and education in the family. Besides the multiple rights of the child which must be respected, there is also the right to play. The organizing of simple games or sportive activities, excursions and camps during the school holidays, for the child, helps him to express his own opinion, joy and personality. Gaming is perceived as a characteristic activity of the childhood age. It is the main activity of a child.
